Advice on safe handling Handle in accordance with good industrial hygiene and safety practice. Avoid contact with eyes. Use personal protection equipment. Do not eat, drink or smoke when using this product. If product has been cooled in transit or storage, it may thicken and appear wax-like. In this case, it is recommended to heat containers to 40-50°C to ensure homogeneity and facilitate pouring. Ovens, hot boxes, electric band heaters, or other similar heating equipment may be used for this purpose.

General hygiene considerations Handle in accordance with good industrial hygiene and safety practice. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Take off all contaminated clothing and wash it before reuse. Contaminated work clothing should not be allowed out of the workplace. Wash hands and face before breaks and immediately after handling the product.

7.2. Conditions for safe storage, including any incompatibilities**Storage Conditions**

Keep containers tightly closed in a dry, cool and well-ventilated place. Keep/store only in original container. Keep container closed when not in use. Store in accordance with local regulations. Keep in properly labelled containers. Protect from direct sunlight. Keep away from food, drink and animal feedingstuffs. Keep at temperatures between 20 and 30 °C. Environments cooler than this may cause product to thicken and appear wax-like. In this case, heating may be required to return product to a homogeneous state and facilitate pouring.
