7. Handling and storage

Precautions for safe handling

Advice on safe handling Handle in accordance with good industrial hygiene and safety practice. Avoid contact with eyes. Use personal protection equipment. Do not eat, drink or smoke when using this product. If product has been cooled in transit or storage, it may thicken and appear wax-like. In this case, it is recommended to heat containers to 40-50°C to ensure homogeneity and facilitate pouring. Ovens, hot boxes, electric band heaters, or other similar heating equipment may be used for this purpose.

Conditions for safe storage, including any incompatibilities

Storage Conditions Keep containers tightly closed in a dry, cool and well-ventilated place. Keep/store only in original container. Keep in properly labeled containers. Store in accordance with local regulations. Keep at temperatures between 20 and 30 °C (68 and 86 °F). Protect from direct sunlight. Keep away from food, drink and animal feeding stuffs. Environments cooler than this may cause product to thicken and appear wax-like. In this case, heating may be required to return product to a homogeneous state and facilitate pouring.
